DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Regarding Claim 2, the phrase "do not moved" renders the claim indefinite because it is unclear what is meant by the specified phrase. It appears to the examiner that the specified phrase should say "do not move" as stated in claim 7. Appropriate correction is required.
- Regarding Claim 8, the claim is dependent on Claim 6 but references the image 3. forming device mentioned in claim 5. It appears to the examiner that the claim should be dependent on claim 5. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 1, 5, 8, 9, 12, 13, 16, 17, 19, 20, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Jinbo et al. (US 2002/0054330)

Application/Control Number: 10/040,380

[0091], page 6, paragraph [0099]).

Art Unit: 2626

6. Regarding Claim 1, Jinbo et al disclose an image forming system comprising portable terminals (portable terminal 210) and an image forming device (image forming apparatus 100), wherein said portable terminals are each equipped with a wireless communication unit capable of wirelessly communicating with said image forming device (antenna 214) (page 4, paragraph [0065]); and said image forming device comprises: a wireless communication unit capable of wirelessly communicating with said portable terminals (communication portion 200) (page 4, paragraph [0062]); an identifying unit for identifying a portable terminal located closest to the image forming device out of portable terminals under wirelessly communicable conditions (Fig. 8, S404) (page 5, paragraph [0079] and (Fig. 11, S603) (page 6, paragraph [0099]); and a power saving control unit for performing power saving control for said image forming device in correspondence with the distance between the identified portable terminal and said image forming device (temperature of the fixing device 118 is controlled based on the mode switching control processing) (Fig. 9, S58 and Fig. 11, page 5, paragraph

Page 3

7. Regarding Claim 5, Jinbo et al disclose an image forming device (image forming apparatus 100) comprising: a communication unit for communicating wirelessly with a portable terminal (communication portion 200) (page 4, paragraph [0062]); and a controller (control portion 203) executing the steps of: obtaining distance between said portable terminal and said image forming device based on result of communication performed by said communication unit (the control portion detects the position of the portable terminal 210 by detecting the distance between the image forming apparatus

Page 4

Art Unit: 2626

100 and the portable terminal 210) (page 4, paragraph [0063]), and performing power saving control for said image forming device in accordance with the obtained distance (mode control switching) (Fig. 11, S603, page 6, paragraph [0099]).

- 8. Regarding Claim 8, Jinbo et al disclose an image forming device further comprising a fusing unit (fixing device 118) (pages 3), wherein said power saving control is temperature control for said fusing unit (pages 3 ad 4, paragraph [0061]).
- 9. Claims 9, 13, and 20 are rejected for the same reason as claim 5.
- 10. Claims 12, 16, 19 and 22 are rejected for the same reason as claim 8.
- 11. Regarding Claim 17, Jinbo et al disclose an image forming system comprising an image forming device (image forming apparatus 100), portable terminals (portable terminal 210) and a control device (control portion 213) for controlling said image forming device, wherein said portable terminals are each equipped with a wireless communication unit capable of wirelessly communicating with said control device (antenna 214) (page 4, paragraph [0065]); and said control device comprises: a wireless communication unit capable of wirelessly communicating with said multiple portable terminals (communication portion 200) (page 4, paragraph [0062]); an identifying unit for identifying a portable terminal of a preregistered user out of portable terminals under wirelessly communicable conditions (Fig. 7, S303) (page 4, paragraph [0073]); and a power saving control unit for performing power saving control for said image forming device in correspondence with the distance between the identified portable terminal and said image forming device(temperature of the fixing device 118 is

Art Unit: 2626

controlled based on the mode switching control processing) (Fig. 9, S58 and Fig. 11, page 5, paragraph [0091], page 6, paragraph [0099]).

Allowable Subject Matter

12. Claims 2-4, 6, 7, 10, 11, 14, 15, 18, and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Satwant K. Singh whose telephone number is (703) 306-3430. The examiner can normally be reached on Monday thru Friday 8am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kimberly A. Williams can be reached on (703) 305-4863. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2626

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
